

Tetra

Tiny Tetra & Friends Activity Book

Discover the enchanting world of aquatics with Tetra!

Collect all
your gold
stars!

Welcome to a wonderful
new underwater
adventure!

Tiny Tetra

Meet Tiny, a bright fish who loves to have fun with his friends. He likes to spend his time swimming fast and chasing bubbles. He's a fun fish!

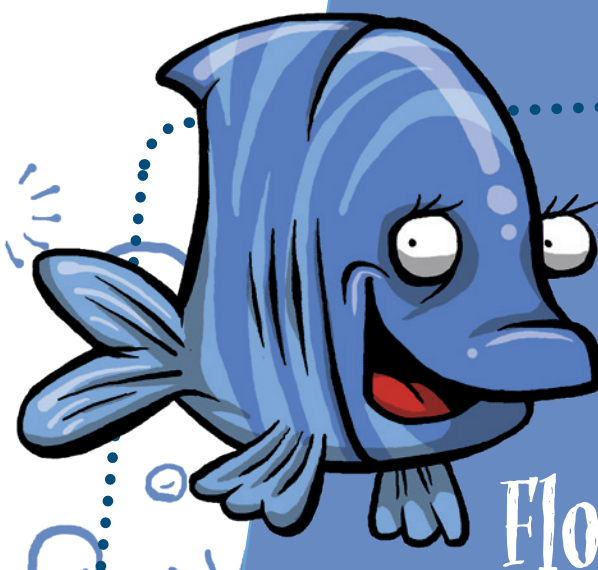

DID YOU KNOW?

Fish are the 3rd
most popular pet
in the UK after
cats and dogs.

Be part of the gang!

Tiny and his friends, Bubbles, Gil, Flo and Finn, want you to be part of their gang, but in order to join, you need to complete the activities in this booklet and colour in all **nine** gold stars! If you're ready for a challenge, let's go!

Before we get started, say hello to Tiny's friends...

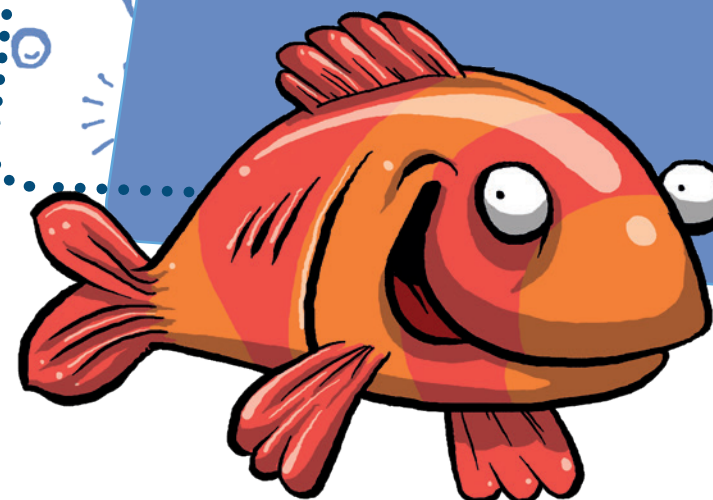

Flo

Meet Flo. She always feels the cold so likes a warm aquarium where the water is just right...

Gil

Gil likes to think he's a cool fish and loves to look sharp with his trendy stripes...

Finn

Finn is a particular fish who is very fussy about his water. He is always checking his filter to make sure his aquarium is clean...

Bubbles

This is Bubbles. She is at her happiest when she's eating—especially her favourite TetraMin tropical food...

1. Want to start your own fish tank?

Join us at the Tetra Academy and be part of the best school!

2. Who lives here?

Here's two of the gang enjoying a relaxing swim... but who are they?

Join the dots to find out and once you're done, colour-in your star!

DID YOU KNOW?

Blind-cave tetras
have no eyes – they
live in caves where
there is no light.

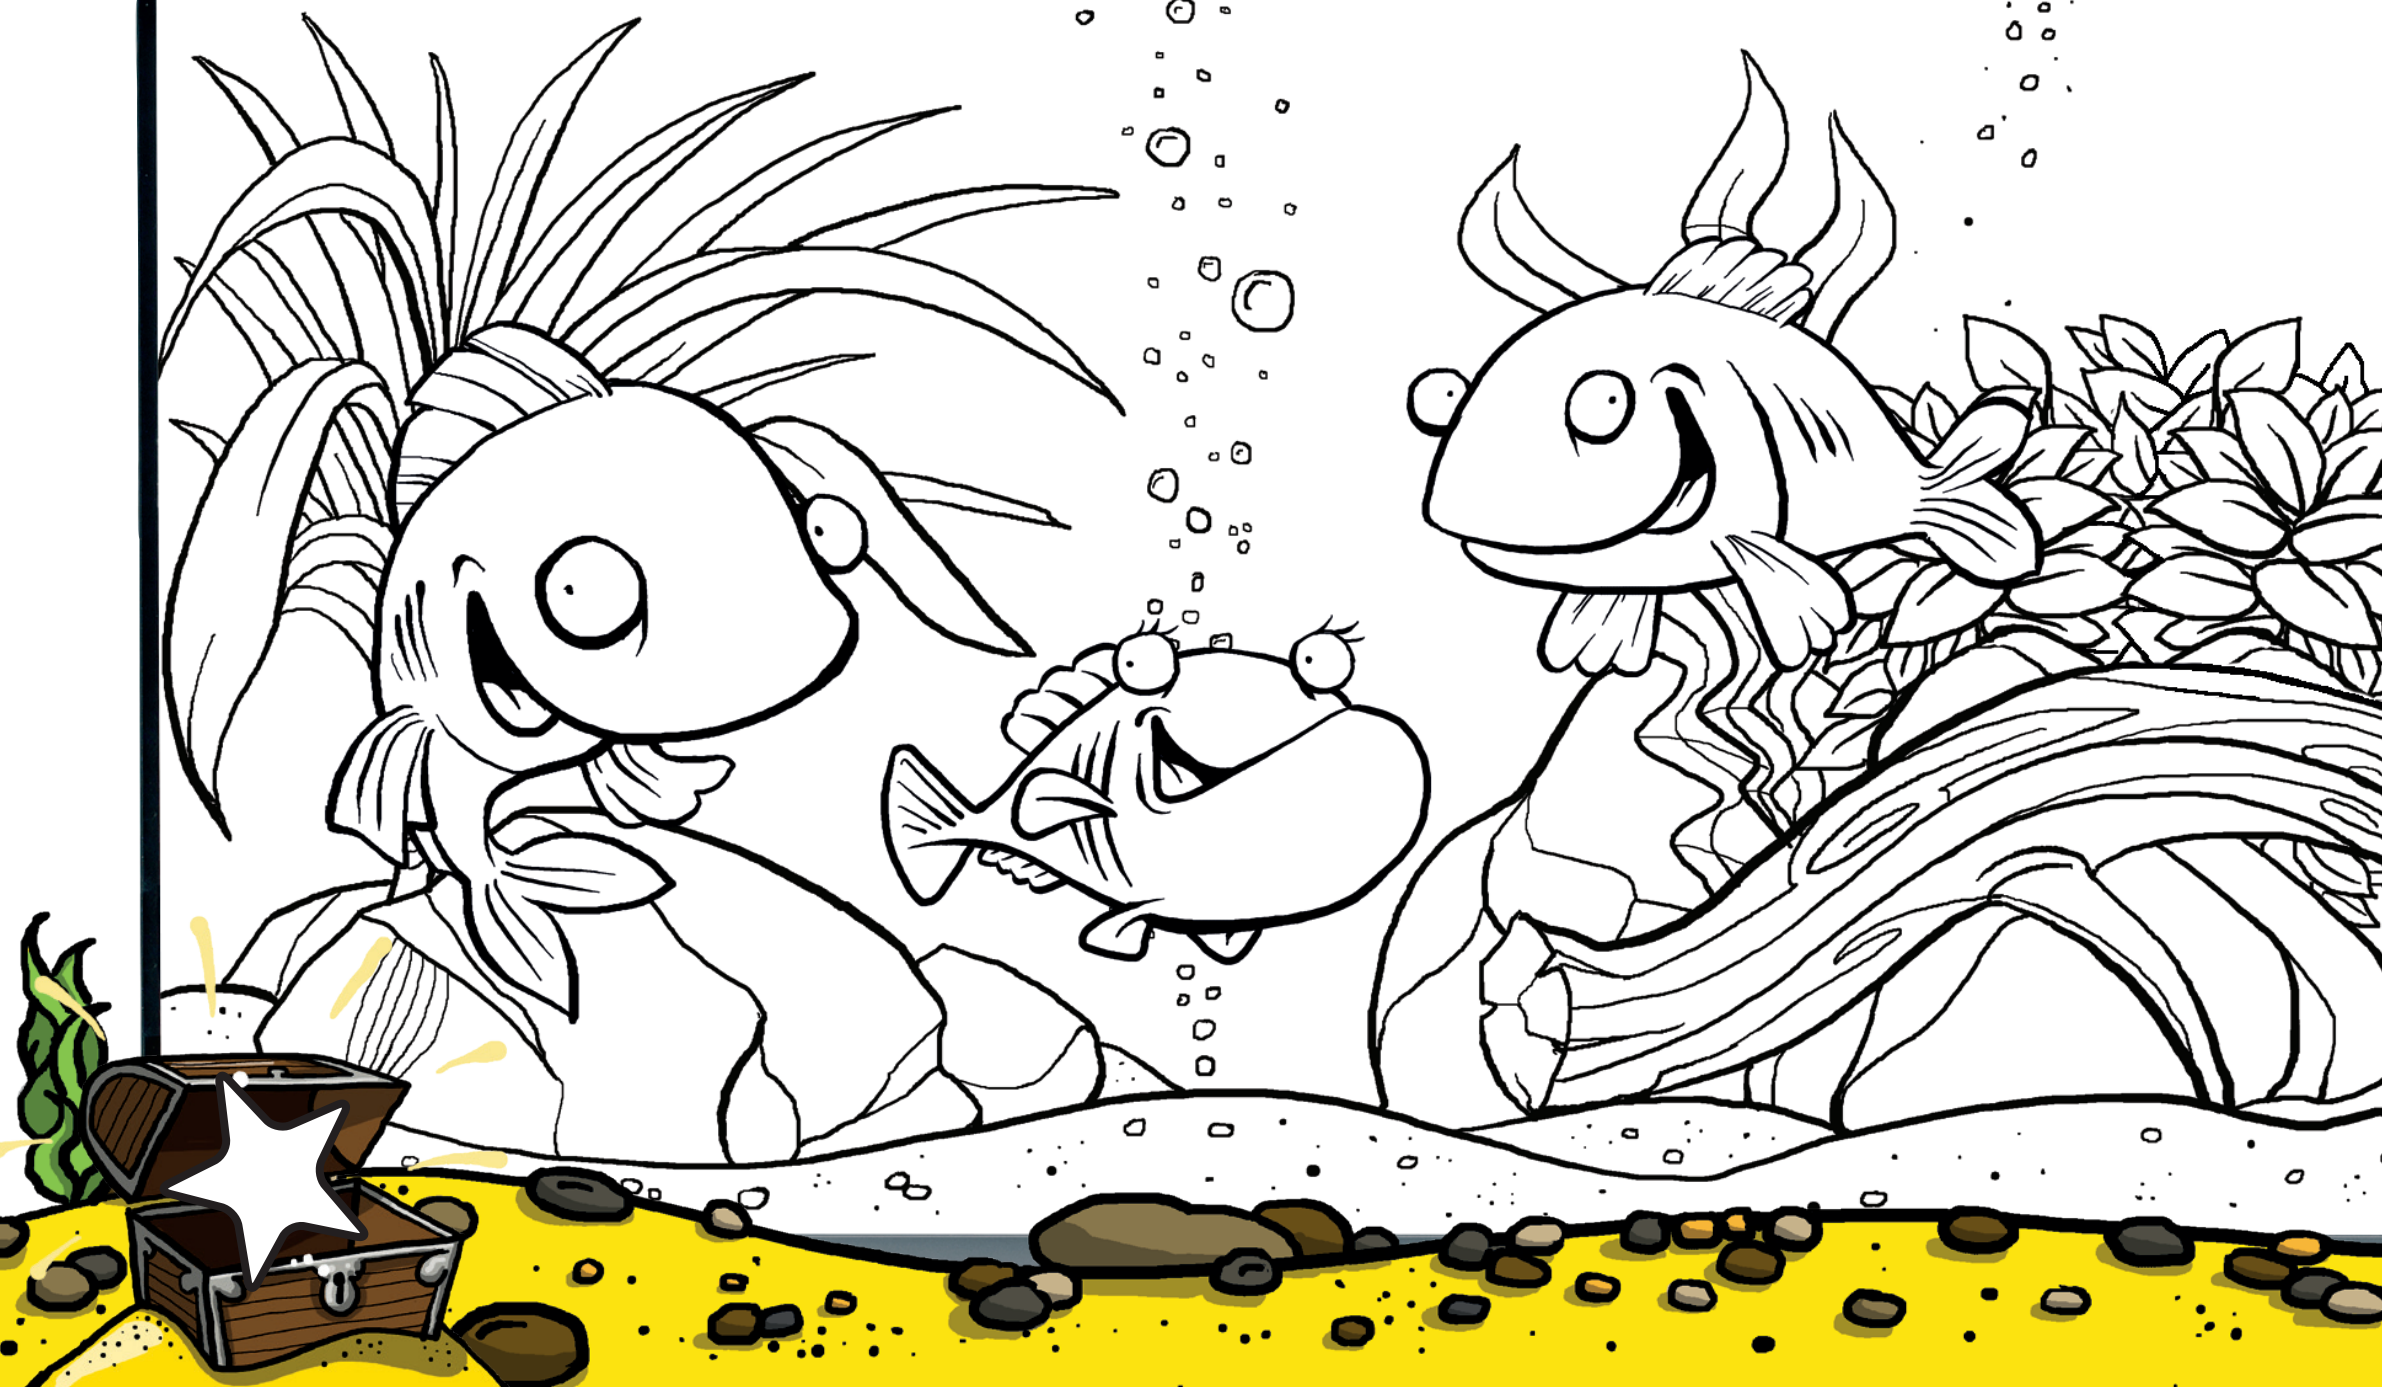

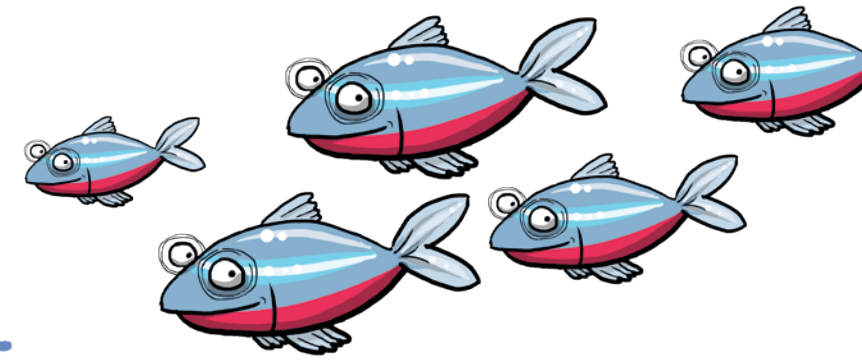

3. Spot the difference!

Gil is playing dress up! Can you spot the 5 differences to earn your gold star?

4. Colour in a magical underwater world

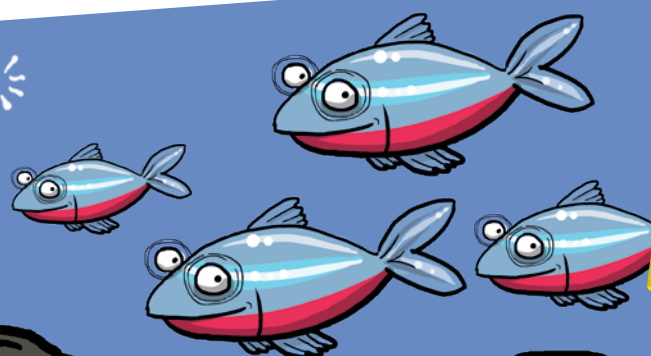

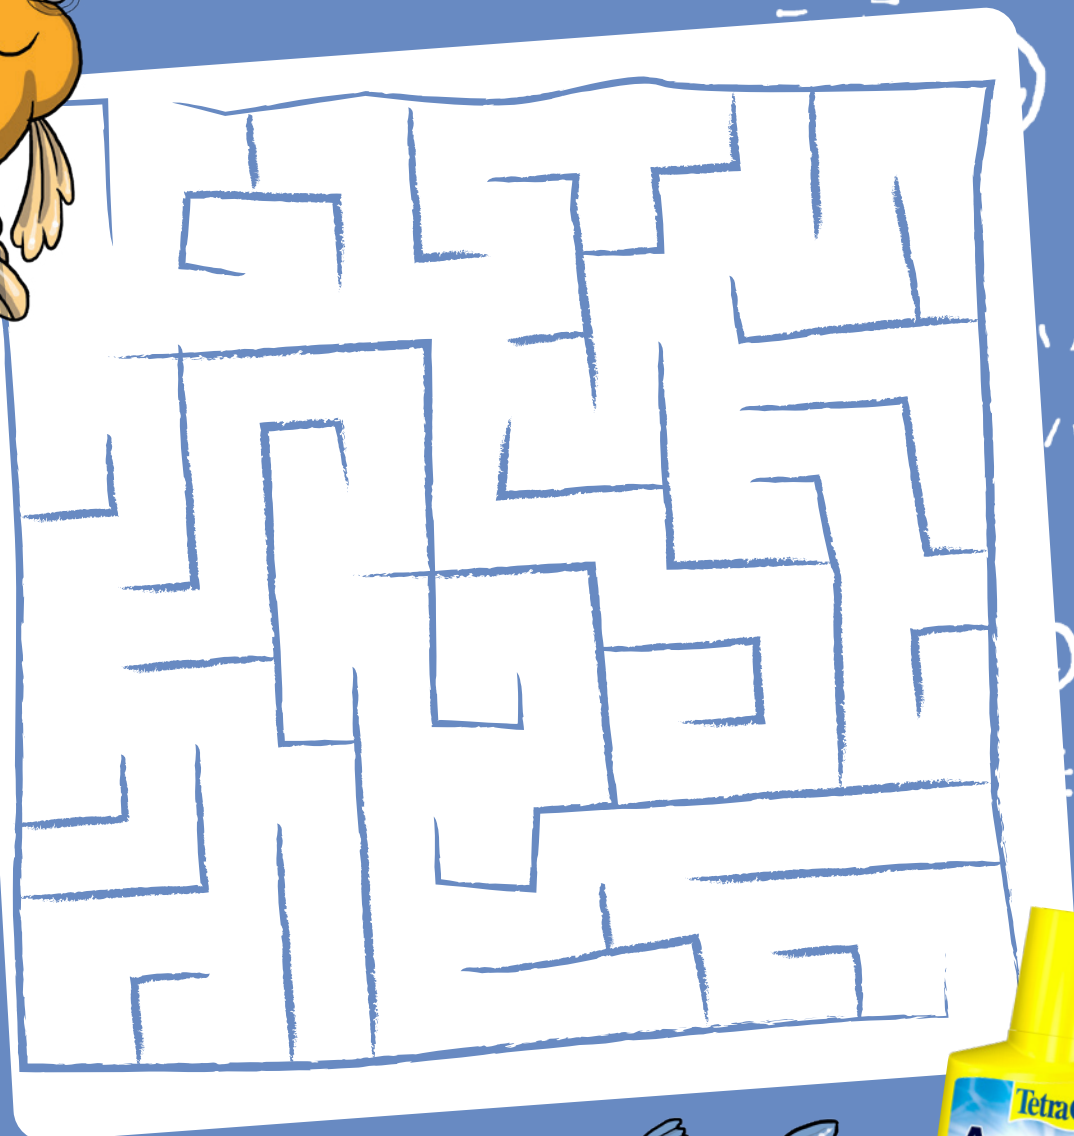

Finn is living in a community tank with lots of other fish. They don't need a heater as they are coldwater fish, but they do like plants and rocks to play in!

DID YOU KNOW?
Goldfish do not have a 3 second memory, experiments have shown they can remember information for at least 3 months.

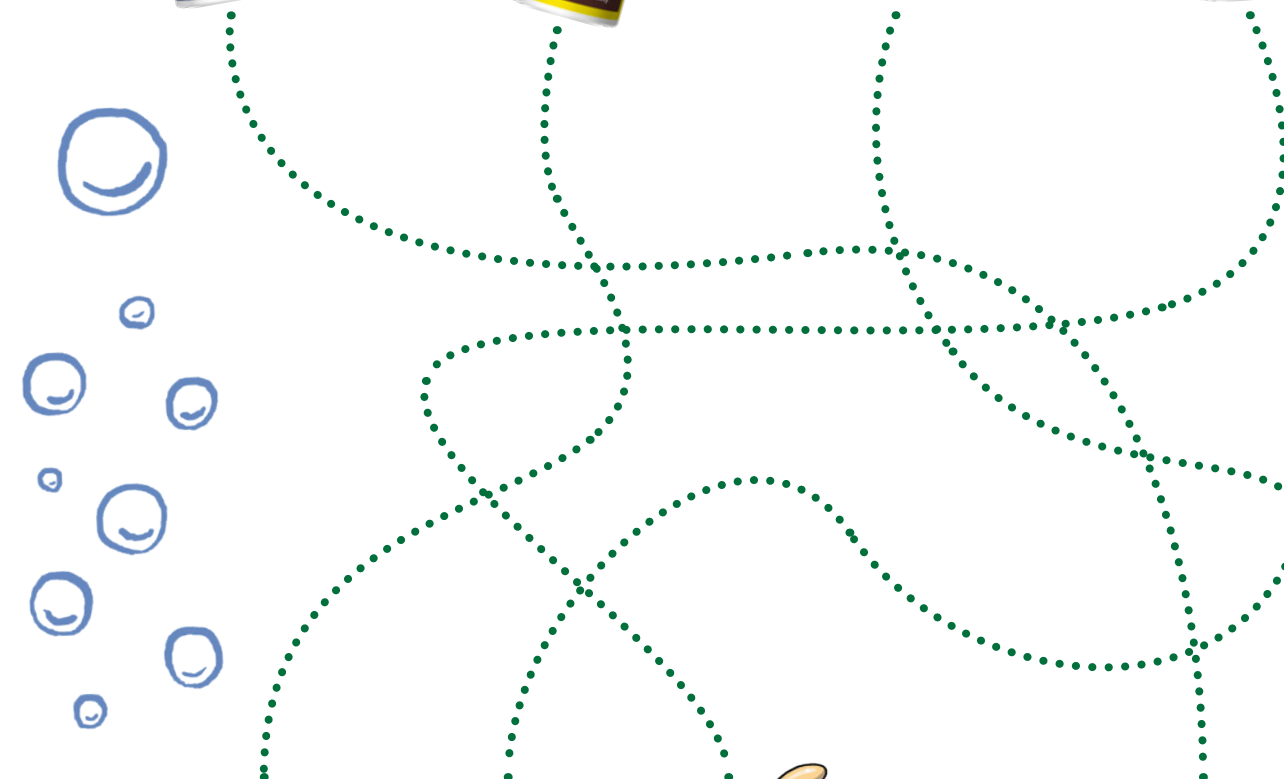

5. Aquasafe to the rescue!

Finn is nearly ready to move into his new aquarium, but tap water can be harmful to fish! To make the water safe, Finn needs to find some **Tetra AquaSafe!**

6. Mealtime Muddle-Up

Oh no! Bubbles, Finn and Gil's food are in a bit of a muddle! **Can you help point Tiny's friends to the right food?** Don't forget to give yourself a star when you're done!

Top tip for feeding ...

All fish need feeding little and often. A good rule is to give them as much as they can finish in 1 minute. A small pinch is a good amount or 1-2 goldfish sticks.

7. Bubbles' Wordsearch

Flo has hidden some words in this wordsearch. **Can you find them all?**
The words can be positioned downwards, across or diagonally on the wordsearch! Find all the words to collect your gold star!

Find these words:

- Aquasafe
- Goldfish
- Angelfish
- Lemontetra
- Tetramin
- Aquarium
- Tropical
- Bubbles
- Tiny
- Finn

DID YOU KNOW?

Many species of aquarium fish look after their babies in their mouths!

8. Where's Tiny?

Tiny has gone on holiday to the coral reef!
Find Tiny in amongst the reef to earn your gold star!

REMEMBER ...

This is just a fun game, Tiny can't really visit the sea as he is not a marine fish. Pet fish must never be released into the wild as they spread diseases and can compete with our native fish causing many different problems.

9. Drawing Tiny!

Tiny likes to shoal with other fish, can you draw another Tetra for him to be friends with?

DID YOU KNOW?

Schooling fish often look identical to confuse predators!
